PROJECTS

Personal Portfolio Project

The Personal Portfolio Website is a modern and responsive web application built using React.js and JavaScript that serves as a showcase of your professional work, skills, and experiences as a web developer. It features a visually appealing and user-friendly interface with smooth transitions and animations to provide an engaging experience for visitors

Job Portal management system

The Job Portal Management System is a web-based application that facilitates the management of job listings, applications, and candidate profiles for a job portal.

To-Do Lists

The To-Do List Application is a web-based application that allows users to create and manage their to-do lists. Users can add tasks, set due dates, mark tasks as completed, and organize tasks into categories or tags. The application is designed to help users keep track of their tasks and manage their time effectively.
